

ThinkHub MultiSite™

real time, room-to-room collaboration

**for distributed teams
across global locations**

KEY FEATURES

SUPPORTS REAL-TIME COLLABORATION

ThinkHub MultiSite connects distributed teams for what feels like a completely in-room, in-person experience. All shared content is synced, including web URLs, GSuite and Office365 documents, hardline video inputs, shared device screens, and more. It can also support all of your file-based content like PDFs, images, and videos.

CONNECTS TEAMS

ThinkHub MultiSite supports up to 10 locations on a shared ThinkHub session. ThinkHub MultiSite locations can be in the same room, same office, or scattered across global locations.

MULTISITE SYNC

Sync your team so everyone in the ThinkHub MultiSite session is locked into the same area of the Canvas. Disable MultiSite Sync when you want your teams to focus on different areas of the Canvas.

ENTERPRISE OR SMB

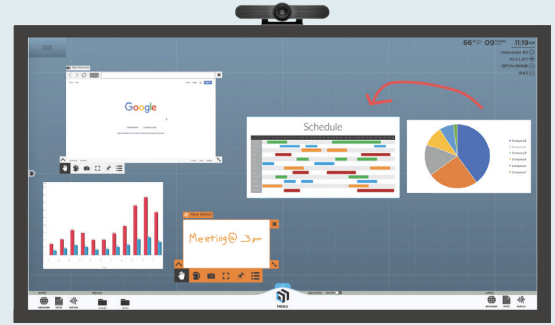

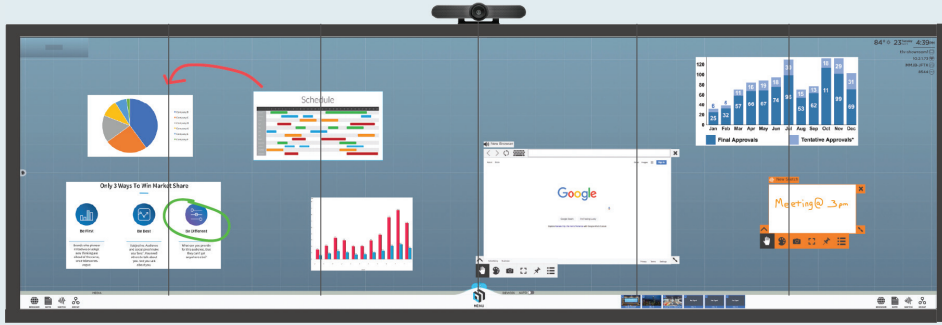

Choose from two secure network options.

Enterprise utilizes the client network to support all connected ThinkHubs

SMB utilizes T1V's cloud-relay server to connect ThinkHubs on different networks

COMES IN ANY SIZE

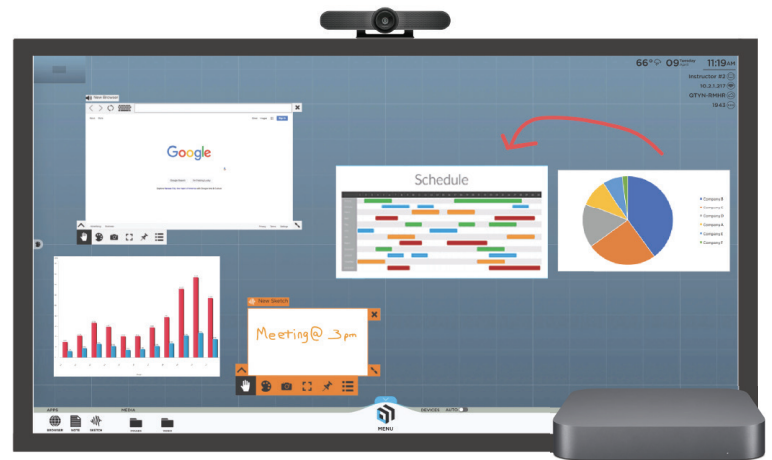

ThinkHub MultiSite enables you to connect different display sizes, from single panel to large multipanel video walls running ThinkHub.

ThinkHub WFA Bundle

T1V's ThinkHub WFA Bundles include ThinkHub MultiSite software plus your choice of video conferencing integration (choose from BlueJeans, MS Teams, Webex, Zoom, or Skype For Business).

Bundles come in a range of touch display sizes, contact your T1V Sales Rep for pricing.

AIRCONNECT REMOTE PARTICIPATION

With AirConnect, remote participants can connect to any ThinkHub MultiSite Session to view, control, and virtually point at the Canvas. They can also share their device screen, send content to the Canvas, and download the ThinkHub session for their records.
